## **Field Inspection Application Guidelines**

#### **Inspection Submission Checklist**

| Fill out all forms completely – one application per field or lot.   |
|---|
| If you are requesting an "other" pest or disease inspection, please contact the Plant Health Program  |
| before submitting your application.   |
| Attach maps that clearly show the location of the fields to be inspected. Include GPS coordinates if  |
| available. Provide clear directions to the field in narrative format.   |
| If you are requesting bean seed field inspections for beans in Malheur County, do not forget to include certified tags. Send paper tags via or include photo copies or digital images if you are applying |
| electronically.   |

#### **General Instructions**

- Fill out the form completely. Incomplete forms may be returned without inspection.
- Only include one lot number OR one field per application. Applications with multiple fields or lots are inspected as one, with all fields or lots subject to the same results.
- Field location: include good quality hand-drawn or computer-generated maps showing field location(s). Maps must include the name of the nearest main road. If a field is not visible from a main road, please include GPS coordinates. Please do not fax or photocopy color maps.
- Companies must notify growers that official inspection(s) are taking place. Failure to notify growers may lead to a delay in inspection.
- If you are applying for bean seed field inspection in Malheur County, please attach certified bean tags as described in OAR 603.052-0385. "True to Variety" certification is a program administered by Oregon State University, not ODA.

#### Fees

- Seed field inspections: \$3 per application; \$6.50 per acre; minimum of \$50 per field, maximum of \$450 per field (OAR 603-056-0315).
- Bean seed fields in Malheur County: \$3 per application; \$3.50 per acre, minimum of \$30 per field (OAR 603-056-0315).
- Allium White Rot inspections: Cost recovery program; varies yearly (OAR 603-051-1054).
- Mint Verticillium wilt inspections: \$60/hour with 1 hour minimum plus mileage (OAR 603-053-0200).
- Potato Late Blight inspections: \$60/hour with 1 hour minimum plus mileage (OAR 603-053-0200).

### **Pesticide Application Reporting**

- After applications have been received and processed, letters will be sent to all seed company representatives informing them of upcoming inspection dates.
- ODA requires a signed statement of pesticide application activity during that time. Fields may not be entered for inspection prior to receipt of the signed statement.
- Once the forms are returned, schedules for inspections will be finalized.
- Keep in mind, field inspectors must comply with mandated re-entry intervals for fields treated with pesticides.

### **Results & Reporting**

- If a reportable pest is discovered, the applicant will be notified as soon as possible.
- Samples will be collected from fields with suspicious pests and taken to the ODA Plant Health Lab for diagnosis. If additional tests are required, the company will be notified prior to testing if additional fees will be assessed.
- All reports will be mailed by October 1st if the inspections were conducted prior to August 1st.
- If reports are required sooner, please notify the ODA as soon as possible and we will do our best to accommodate you.
